PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 3+ years of professional web development experience, including 1+ years at the Georgia Department of Education architecting and maintaining critical educational technology systems serving 1.75M+ K-12 students across 2,316 schools and 121K+ educators. Expert in building scalable, user-focused applications across government technology ecosystems. Proficient in JavaScript/TypeScript, PHP, and modern frontend frameworks. Proven ability to own projects end-to-end, from UI/UX implementation to backend architecture and database optimization. Currently leading organizational AI/agent development initiatives, architecting Model Context Protocol (MCP) infrastructure and enabling AI-assisted development workflows. Strong track record of delivering mission-critical solutions in high-impact government environments.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Georgia Department of Education | March 2025 - Present

Hired as UI/UX Developer; rapidly evolved into full-stack ownership of mission-critical educational platforms serving millions of K-12 students and educators across Georgia's state education system.

- Architected and maintained H5P-based PHP platform serving thousands of concurrent users across Georgia Virtual School (GAVS), handling both frontend and backend responsibilities; system serves educational needs for children and adults across the state
- Served as sole design/development resource for 1+ year on GALEADS (Georgia Leadership Evaluation & Development System) — mission-critical platform used by principals, assistant principals, and superintendents across 2,316 schools for leadership evaluation and professional development
- Mastered SQL and relational database architecture, optimizing queries for performance and scaling data operations to support statewide deployments serving 1.75M+ students and 121K+ educators
- Leading organizational AI development strategy; architecting Model Context Protocol (MCP) infrastructure to standardize AI integration across teams and enabling AI-assisted development workflows to accelerate delivery
- Designed and implemented comprehensive testing automation framework, improving code reliability and reducing manual QA overhead across multiple critical educational platforms
- Collaborated with cross-functional teams (product, design, compliance, leadership) to translate requirements into scalable, secure technical solutions meeting state government standards and accessibility requirements

Junior Front-End Developer | RikerWeb | January 2022 - December 2023

Full-service digital marketing agency specializing in website development and virtual storefronts for local businesses.

- Built responsive, accessible UIs using Vue.js and React; translated Figma designs into production-ready components with emphasis on UX best practices and accessibility compliance
- Mastered modern CSS frameworks (TailwindCSS) and component-driven architecture; created reusable, maintainable component libraries reducing development time and improving consistency
- Developed proficiency in design-to-code workflows; collaborated with designers to ensure pixel-perfect implementation and accessibility compliance across projects

Junior Software Development Apprentice | Coding for Hermit Crabs | April 2023 - July 2023

Non-profit focused on digital access and technology education in underserved communities.

- Completed intensive bootcamp-style apprenticeship; rapidly acquired proficiency in Django, Python backend development, and full-stack architecture concepts
- Collaborated in agile team environment; contributed to production Django applications and open-source educational technology initiatives supporting underserved communities

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, Python, HTML/CSS, SQL

Frontend Frameworks: React, Next.js, Vue.js, TailwindCSS, Framer Motion

Backend & Databases: Node.js, Express.js, Django, PHP (LAMP stack), MySQL, SQL, H5P

AI & Automation: Model Context Protocol (MCP), Agentic Development, Testing Automation, AI-Assisted Development Workflows, Prompt Engineering

Visualization & Design: Three.js, D3.js, Blender, Figma, Spline

Tools & Practices: Git/GitHub, GitLab, Figma, UI/UX Design, Accessibility (WCAG), Agile

Domains: Government Technology, Educational Technology (K-12), State Systems, SaaS, Digital Marketing

NOTABLE PROJECTS & ACHIEVEMENTS

GALEADS Leadership Evaluation Platform (Georgia Dept of Education) — Sole designer/developer for 1+ year on mission-critical system serving principals, assistant principals, and superintendents across Georgia's 2,316 schools. Architected full-stack solution for leadership evaluation and professional development; responsible for both UI/UX design and backend system implementation serving 121K+ educators.

H5P Educational Platform - Georgia Virtual School (GAVS) — Designed and maintained full-stack PHP/MySQL application serving thousands of concurrent users. Owned both frontend (responsive UI/UX) and backend (database optimization, business logic). System serves educational needs for children and adults across Georgia's virtual school program.

AI/MCP Organizational Infrastructure Initiative — Leading development of Model Context Protocol (MCP) infrastructure to standardize AI integration and enable AI-assisted development workflows across the organization. Architecting frameworks that accelerate team delivery and prepare the organization for cutting-edge AI-powered development practices.

Testing Automation Framework — Designed comprehensive testing strategy and automation framework reducing manual QA burden and improving code reliability across mission-critical educational platforms.

Personal Portfolio (React/Next.js/Framer) — Showcases modern frontend capabilities; demonstrates advanced animation, responsive design, and component architecture. Portfolio experience.

Data Visualization & 3D Graphics — Experienced with Three.js, D3.js, and Blender for creating immersive, interactive visual experiences and complex data storytelling.

EDUCATION

Coding for Hermit Crabs Intensive Bootcamp | Full-Stack Web Development Apprenticeship (2023)

Pikes Peak State College | Associate Degree, Political Science (2015-2017)

ADDITIONAL SKILLS & INTERESTS

- Advanced visualization and interactive data storytelling | • Cutting-edge frontend architecture | • 3D graphics and immersive web experiences | • Government technology compliance and security best practices |
- State-scale system architecture | • AI-driven organizational transformation
